

## **Viridian Seeds Wins “Best Project Team” Award at EIT Food Seedbed, Warsaw**

*Recognised for Team Execution, Scientific Strength, and Commercial Potential*

Warsaw, Poland – Viridian Seeds is proud to announce that it has been awarded the “Best Project Team” prize at the EIT Food Seedbed Incubator Meeting in Warsaw, a flagship European programme supporting high-potential agri-food and agri-biotech ventures.

The award recognises Viridian Seeds’ ability to combine deep scientific expertise with strong execution and a clear path to commercialisation. Selected from a competitive cohort of startups across Europe, the company stood out for its cohesive team, robust innovation strategy, and potential to deliver scalable impact in agriculture.

Supported by EIT Food and co-funded by the European Union, the Seedbed Incubator Programme accelerates ventures addressing food security, sustainability, and crop productivity. Participation enabled Viridian Seeds to sharpen its market focus and accelerate its growth roadmap.

This recognition positions Viridian Seeds strongly as it advances toward strategic partnerships, pilot deployments, and future fundraising.

### **About Viridian Seeds**

We develop climate-resilient, non-GM “Super-Crops” using our proprietary genomics, AI-based gene discovery, and advanced GE methods bringing scalable innovation to legumes, tomatoes, and other high-impact crops.
